**To:** Board of Directors  
**From:** Henry N. White  
**Date:** May 4, 2020  
**Subject:** Consideration of Contract with Cardno for Species and Temperature Monitoring during the 2020 Transfer

---

On May 13, 2020, Foresthill Public Utility District filed with the State Water Resources Control Board, Division of Water Rights a petition for temporary change involving the transfer of 2,000 acre feet of water under water right permit #15375 to Westlands Water District. The California Department of Fish and Wildlife and the United States Forest Service commented on Foresthill's petition. The comments requested Foresthill to establish a species and temperature monitoring program during the 2020 transfer.

The Division of Water Rights concluded the transfer would not injure any legal user of water and would not have an unreasonable effect upon fish, wildlife or other instream beneficial uses and approved the petition on July 23, 2020. The Division of Water Rights placed 17 conditions on the approval of the petition. Condition 9 of the approval directs Foresthill to establish a temperature and species monitoring program and to submit the results of the program to the California Department of Fish and Wildlife and the United States Forest Service.

Cardno, Inc. is a consulting firm with the expertise to establish a monitoring program that will satisfy the condition placed on the petition approval. Cardno assisted the Placer County Water Agency with the application for a new license for the Middle Fork American River Hydroelectric Project. The firm developed American River temperature models and monitored for species along the North and Middle Forks American River. Cardno has worked extensively in our area and is currently assisting other American River transfer agencies with their 2020 transfers.

The attached proposal will satisfy the condition placed on the petition submitted by Foresthill. The cost of the effort is not to exceed \$19,860. Gross revenue from the transfer is \$700,000 so the monitoring effort is about 3% of the revenue.

Staff's recommendation is to authorize the execution of a contract with Cardno for species and temperature monitoring at a cost not to exceed \$19,860.

August 4, 2020

Hank White  
Foresthill Public Utility District  
P.O. Box 266, Foresthill, CA 95631  
(530) 367-2511

**Re: Foresthill Public Utility District August-September 2020 (2,000 AF)  
Water Transfer Monitoring Scope and Cost Estimate**

Dear Hank,

Cardno is pleased to submit the following scope of work and cost estimate to assist Foresthill Public Utility District (PUD) with monitoring of the 2,000 AF water transfer from Sugar Pine Reservoir.

### **Introduction**

Cardno will provide biological and temperature monitoring of the water transfer. Water temperature will be monitored at four general locations starting before the transfer and ending after the transfer. Foothill yellow-legged frogs (FYLF) and habitat will be monitored three times: once before the transfer, once during the transfer, and once at the end of the transfer. Habitat will be measured and observations of FYLF will be recorded at three habitats units in lower North Shirttail Creek that represent good FYLF habitat. Also, two qualitative observations will be conducted once during the up-ramp and once during the down-ramp to identify if there are any obvious behavioral effects to FYLF during flow changes. Table 1 and Figure 1 show the monitoring locations and monitoring dates (adjustable depending on the exact dates of the transfer).

### **Tasks**

The tasks to complete the transfer monitoring are described below.

#### **Coordination with Foresthill PUD and Agencies**

Cardno will coordinate with Foresthill PUD regarding the timing of the transfer and field work (including obtaining flow data from Foresthill PUD). Cardno will also participate in a coordination call with applicable agencies (e.g., US Forest Service, California Fish and Wildlife), as needed.

#### **Water Temperature Monitoring**

Cardno will purchase and install duplicate water temperature probes at the four locations listed in Table 1. At the North Shirttail Creek confluence with the North Fork American River, temperature probes will be installed above and below the confluence. The below confluence site will be far enough downstream that complete mixing has occurred. Duplicate temperature recorders will be placed in different locations to help avoid lost data due to vandalism.

**Quantitative FYLF Habitat Monitoring**

Cardno will identify three representative FYLF tadpole habitats in lower North Shirttail Creek (e.g., pool tailouts, edgewater habitats) and measure the amount of tadpole habitat (see habitat description in PCWA 2011) in the creek prior to the transfer and during the peak of the transfer. Cardno will also identify the number of tadpoles or juvenile FYLF at the sites at the beginning of the transfer, at the peak of the transfer, and at the end of the transfer.

**Qualitative FYLF Tadpole Monitoring**

At the quantitative habitat sites described above, Cardno will observe tadpoles (if present) during the increased flow due to the transfer and during the decreased flow when the transfer is receding to determine if there are any potential adverse behavioral effects of the flow changes on FYLF.

**Summary Memo**

Cardno will provide Foresthill PUD a draft memorandum describing the study methods and the study results, including data sheets and data files. The memorandum will include a discussion of FYLF habitat along the length of North Shirttail Creek (e.g., steeper habitat below the dam and lower gradient habitat near the North Fork American River confluence). Following review by Foresthill PUD, Cardno will provide a final memorandum that can be distributed to applicable Agencies.

**Table 1. Proposed Monitoring Events and Dates Assuming a Start and End Date of the Water Transfer of August 19<sup>th</sup> and September 23<sup>rd</sup>, Respectively.**

Location	Temperature Probe Install (date; number)	FYLF Initial Survey (date)	FYLF Tadpole Qualitative Flow Change Observations (date)	FYLF Initial Survey (date)	FYLF Final Survey and Check Temperature Probes (date)
<b>Water Temperature Monitoring July-October</b>					
North Shirttail Creek below Sugar Pine Dam	Early August (2)	--	--	--	After Sept 23 <sup>rd</sup>
North Shirttail Creek above NF American River Confluence	Early August (2)	--	--	--	After Sept 23 <sup>rd</sup>
NF American River above the Shirttail Creek Confluence	Early August (2)	--	--	--	After Sept 23 <sup>rd</sup>
NF American River below the Shirttail Creek Confluence	Early August (2)	--	--	--	After Sept 23 <sup>rd</sup>
NF American above Folsom Reservoir	Existing Gage	--	--	--	Existing Gage
<b>Foothill Yellow-Legged Frog Monitoring</b>					
Lower North Shirttail Creek (three representative habitats)	--	Before Aug 19 <sup>th</sup>	About Aug 28 <sup>th</sup> and Sept 20 <sup>th</sup>	About Sept 10 <sup>th</sup>	After Sept 23 <sup>rd</sup>

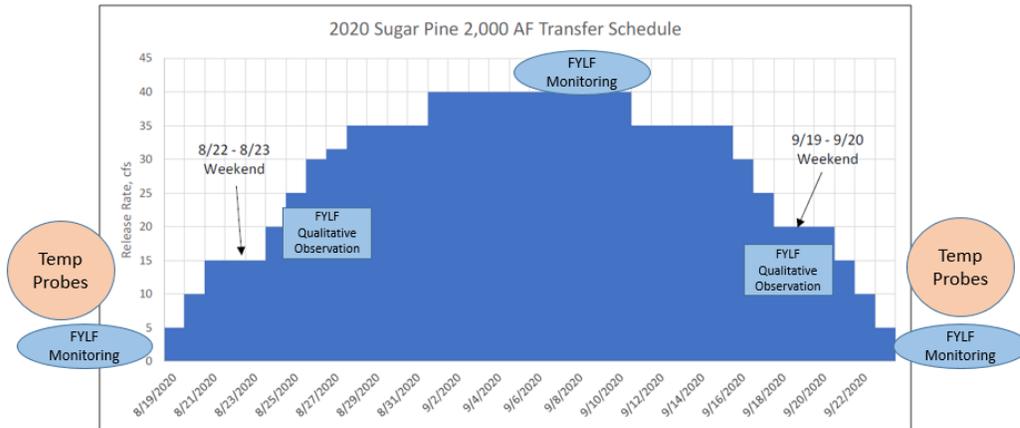

Figure 1. Transfer Schedule, Water Temperature Install/Removal and FYLF Monitoring.

Cardno will also participate in one phone call with Agencies to address questions regarding the memorandum.

**Estimated Budget**

Cardno’s time and expenses will be billed on a time-and-materials basis in accordance with Exhibit B of the contract. The not-to-exceed budget for this scope of work is \$19,860. The estimated budget is provided in Attachment A. If some of the site visits can be removed or if on some of the surveys we can replace our staff with your staff, the budget can be reduced.

**Assumptions**

Products identified above will be developed and provided by Cardno at the budget identified. The costs of additional products or additional meetings with Resource Agencies will be negotiated with Foresthill PUD, as needed. We appreciate the opportunity to work with Foresthill PUD on this task. Please contact me at (435) 881-1835 or Ed Bianchi (916) 761-4641 if you have any questions or need additional information.

Sincerely,

*R. Craig Addley*

**Cardno, Inc.**

Item H2

The dues formula shall be based on adjusted operation and maintenance expense for the following activities of a district:

- water;
- waste water;
- electric;
- land reclamation and levee maintenance;
- flood control and water conservation; and
- drainage and drainage maintenance.

2020 ACWA dues are based on the 2017-2018 fiscal year. Members joining after the beginning of the calendar year shall have their dues pro-rated for the remainder of the year. Members joining after October 1 will have their dues pro-rated for the current year and will be billed concurrently for the following year's dues.

# FORESTHILL PUBLIC UTILITY DISTRICT

## Value of ACWA Membership – *At a Glance*

As the largest coalition of local public water agencies in the country, ACWA works hard to assist its members with the critical job of providing safe, reliable water to Californians. From advocacy to information to education on new trends, ACWA members have powerful resources to help them meet challenges at the local level. **Foresthill Public Utility District joined ACWA original in 1991, and was an active member until 2016.** ACWA welcomes at the opportunity to have Foresthill PUC rejoin ACWA's membership.

With strong direction from ACWA's Board of Directors and active member involvement through ACWA's policy committees, task forces and regions, ACWA is engaged in numerous arenas to advance priority issues. Here is a high-level look at recent activity and initiatives:

### **Drinking Water Solutions for Disadvantaged Communities**

After extensive advocacy by ACWA and its members in 2017, SB 623 (Monning) was not enacted into law in 2017. The bill is a two-year bill, which is currently at the Assembly Rules Committee. The measure is intended to fill gaps in funding for disadvantaged communities without access to safe drinking water. ACWA agrees with that intent but opposes the tax on drinking water proposed in the bill because it is not the right approach to solving this social issue for the state. ACWA is advancing a more appropriate funding solution – a package of funds that is comprised of federal safe drinking water funds, general obligation bond funds, assessments related to nitrates in groundwater that are proposed in the bill and funding from the State General Fund.

On Wednesday, Jan. 10, Governor Jerry Brown issued his proposed budget for Fiscal Year 2018-19. In the summary of the proposed budget, the Administration states that it is “proposing statutory language, consistent with the policy framework of SB 623 (...).” This language is not available yet, but the Department of Finance informed ACWA that all budget trailer bills would be posted by Feb. 1. All signs are that the Administration plans on having a budget trailer bill in this area. ACWA members need to remain alert and expect further advisories and Outreach Alerts from ACWA regarding SB 623 or a related budget trailer bill. This may include a call to action like the campaign during the summer of 2017, when ACWA members played an integral role in sharing key opposition messages on social media, through local op-eds, letters to the editor and outreach to legislators.

### **STAFF CONTACT**

Cindy Tuck,  
Deputy Executive Director for Government Relations  
[cindy@acwa.com](mailto:cindy@acwa.com)

### **Long-Term Conservation Legislation**

As with SB623, AB 1668 and SB 606 return in 2018 as two-year bills. The same ACWA advocacy that played a key role in stopping these two bills will continue into the New Year, with ACWA maintaining its oppose-unless-amended position on both. ACWA will continue engaging the Legislature and the Brown Administration to identify and resolve remaining issues and find a workable approach to state policy on conservation and water-use efficiency.

Whitnie Wiley  
Senior Legislative Advocate  
[whitniew@acwa.com](mailto:whitniew@acwa.com)

**Water Storage Investment Program**

The California Water Commission is evaluating eleven water storage projects relative to allocation of the \$2.7 billion in Proposition 1 funds available for investment into new water storage projects, with early funding decisions expected in June 2018. ACWA has informed the decision-making process through preparation and roll-out of a study on the integration of water storage.

**STAFF CONTACT**

Dave Bolland  
Director of State Regulatory Relations  
[daveb@acwa.com](mailto:daveb@acwa.com)

**Bay-Delta Flow Requirements**

ACWA continues to accept resolutions or formal letters of support from its members on its policy statement regarding Bay-Delta flow requirements. The policy statement urges the State Water Resources Control Board (State Water Board) to set aside its problematic “unimpaired flow” approach to setting new water quality objectives and to heed Gov. Jerry Brown’s call for negotiated agreements.

So far, 147 ACWA members have formally supported ACWA’s policy statement on Bay-Delta flow requirements either through resolutions or letters of support, and ACWA is continuing to build on that number. ACWA has also submitted the policy statement to the State Water Board and the California Legislature. The Member Outreach and Engagement Department is maintaining a map listing ACWA members that have adopted resolutions. The Communications Department also developed a short educational video with ACWA Associate CV Strategies to explain the issues. Details are at <https://www.acwa.com/resources/policy-statement-on-bay-delta-flow-requirements>.

**Engaging Agricultural Members**

ACWA membership approved the formation of a standing committee composed of agricultural members at last year’s Fall Conference. This is the culmination of work throughout 2017 to significantly expand ACWA’s focus on agricultural members and the many issues affecting their communities. ACWA is currently accepting

consideration forms to fill the Agricultural Committee, which does not have a limit on members. The deadline for submitting member considerations is Feb. 2. Following the February deadline, ACWA's President Brent Hasteley will make appointments upon recommendations of the region chairs and vice chairs. Regulatory Advocate Adam Borchard will be the Committee Liaison.

#### **Water Rates Policy / AB 401 (Dodd, 2015) Implementation**

ACWA continues to participate in the State Water Board's development of a plan for a statewide low-income water rate assistance program pursuant to AB 401. ACWA is opposing suggestions from State Water Board staff in 2017 that this program, which could result in a subsidy for water fees for one-third of California households, should be funded by a public goods charge (i.e., a tax on water). The association's AB 401 Implementation Working Group is currently active in this area.

As a result of ACWA's comment letters and advocacy last year, State Water Board staff agreed to hold a stakeholder meeting last summer. At that meeting, State Water Board staff heard ACWA's concerns with the proposal that local water agencies implement this program. State Water Board staff has now committed to having more process and to sharing a draft of the plan for comment.

ACWA will continue to advocate with State Water Board members, State Water Board staff and the Brown Administration regarding this topic during 2018.

#### **STAFF CONTACT**

Cindy Tuck  
Deputy Executive Director for Government Relations  
[cindy@acwa.com](mailto:cindy@acwa.com)

#### **Groundwater Replenishment**

AB 1427 would allow stored or replenished groundwater to be declared a beneficial use, a position shared by ACWA through its groundwater policy principles. However, the bill is subject to controversy. ACWA staff is leading an effort at the working group level to build consensus around a solution, whether legislative or administrative, that would permit the recharge of groundwater as a beneficial use.

Internally, ACWA's own Groundwater Replenishment Initiative Task Force is developing a work plan for how the ACWA can identify strategies, projects, programs or recommendations to increase groundwater replenishment.

**STAFF CONTACT**

Dave Bolland  
Director of State Regulatory Relations  
[daveb@acwa.com](mailto:daveb@acwa.com)

**Federal Advocacy on Wildfire-Headwaters Legislation**

ACWA is working with a broad coalition of Western water suppliers on wildfire and headwaters legislation. The coalition advocates in support of collaborative forest management, streamlining the environmental review process, and addressing the unsustainable practice of fire borrowing. The House passed ACWA-supported HR 2936, titled the "Resilient Federal Forests Act of 2017" on November 1. The vote was 232 to 188.

ACWA Executive Director Timothy Quinn participated in numerous Capitol Hill meetings with as a member of the California Forest and Watershed Alliance (CAFWA) between Jan. 8-10. Negotiations are underway to try and reach agreement on language to fix the fire borrowing budget problem and increase the pace and scale of forest management. Such language could be attached to one of the budget-related bills moving through Congress next week. If that doesn't happen, the likely next vehicle for wildfire language is the Farm Bill.

**Save Our Water Program**

The Save Our Water program received \$1 million in new state funding at the start of the fiscal year in July. The funds are being used to support water agency conservation and statewide public outreach activities through June 2018. The contract extension will allow the program to continue paid and earned media efforts, research, and program management. With the contract extension in place, SOW launched a statewide summer public education campaign in late July, continuing with the theme "Small Changes. Big Impact," which is focused on simple daily habits and easy permanent changes both in and outside the house. Paid media campaign elements include radio ads and sponsorships, and digital and social media efforts.

SOW's Fall landscaping campaign launched the second week of October on the program's website and social media channels. Social media efforts for the campaign are being coordinated with Plant California, local nurseries, Sunset Magazine, Jain Irrigation, Scotts MiracleGro and local landscapers. New materials for use by local water agencies is available on SOW's Toolkit webpage at [www.saveourwater.com/toolkit](http://www.saveourwater.com/toolkit).

**STAFF CONTACT**

Heather Engel  
Director of Communications

**Connecting with the Next Generation**

An ACWA Advisory Committee, as part of ACWA's *Plan for Engaging the Next Generation of Water Industry Leaders*, has developed a member outreach toolkit with input from the ACWA Communications Committee.

The toolkit offers a suite of tools for members to use in their own communities to help engage the next generation. It is available online at <http://www.acwa.com/resources/nextgen>.

Additionally, the ACWA Board of Directors on Sept. 29 approved the Ted and Nancy Way Scholarship for the Next Generation of Water Leaders. The scholarship, funded by the Way family, will be awarded each year in two \$5,000 disbursements to two deserving undergraduate students in a water-related field. Nominations for the first Ted and Nancy Way Scholarship are now open. This represents a continuing effort to attract young people to the water industry.

**Integrated Marketing / Communications / Outreach Plan**

ACWA completed a critical element of its Integrated Marketing / Communications / Outreach Plan with its completion of a redesigned website, which launched this summer. In addition to sporting ACWA's new logo, the redesigned website features easier access to members-only content and allows for easier sharing on social media of ACWA's staff-created member profiles and features. Additionally, staff is developing a comprehensive social media strategy to better advance ACWA's policies and issues.

**STAFF CONTACT**

Heather Engel  
Director of Communications  
[heathere@acwa.com](mailto:heathere@acwa.com)

**Business Development**

The ACWA Board has placed a high priority on raising ACWA's non-dues revenue. Through the Business Development Committee, a consultant was hired to come in to evaluate current revenue sources and to make recommendations on new revenue sources to support ACWA's future. The consultant gave ACWA a full recommendation report which has been classified in three tiers based on the scope of work to implement these new ideas and processes. The report's recommendations are expected to increase non-dues revenue by at least the \$125,000 set in the approved 2018 budget.

ACWA departments are meeting Jan. 12 to discuss next steps in implementing the recommendations, which include raising non-dues revenue through advertising on the ACWA website, in ACWA News and through ACWA social media postings.

## Ways to Maximize Your ACWA Membership

In addition to advocacy and a voice on key water issues, your membership in ACWA gives you access to a wide variety of information, resources and value-added programs. To help you get the most of your membership, here are a few tips for maximizing your participation in ACWA.

*More information on ACWA Committees, Outreach Program, Upcoming Events, ACWA Regions, ACWA News and ACWA's Preferred Provider Program can be found on [www.acwa.com](http://www.acwa.com).*

# 1

## Engage In the Issues

A great way to stay current and engage in setting ACWA's policy agenda is to join a committee. ACWA has 12 active committees that meet throughout the year, providing key technical and policy input to the ACWA Board of Directors. The committees bring together expertise and perspectives from across the state on key state and federal issues to help ACWA advocate for members in Sacramento and in Washington D. C.

# 2

## Get Active

Joining ACWA's Outreach Network allows you to receive all ACWA alerts and advisories on important water issues. It also provides a convenient way to send letters and make contact with your local legislators. ACWA's Outreach Network includes more than 2,000 ACWA members.

# 3

## Build Your Network

Take advantage of ACWA's two annual conferences and other events to network with water professionals throughout the state. ACWA's annual DC Conference, Legislative Symposium, Regulatory Summit and a Continuing Legal Education Workshop offer outstanding programming tailored to public water agency directors and staff.

# 4

## Engage Locally

ACWA's 10 regions host several regional meetings, programs and tours throughout the year on a variety of topics. These well-attended events are a great way to learn about local issues as well as network with your neighboring districts.

# 5

## Get Wired

ACWA's website — [acwa.com](http://acwa.com) — is updated daily with California's latest water news and information. Create a member login and receive RSS feeds on your favorite topics and special members-only content with current information on ACWA's policy direction, including *ACWA News*, as well as weekly electronic newsletters. ACWA also has active Facebook and Twitter feeds that engage and keep members current.

# 6

## Use Our Toolkits

ACWA regularly produces communications tools and resources members can use to communicate with their customers and other audiences. Recent examples include tools for communicating the value of water, special district reserves, a draft drinking water standard for Chromium 6, and the water-energy nexus. All are available to members on our website, [www.acwa.com](http://www.acwa.com).

# 7

## Get Discounts

ACWA's Preferred Provider program has a variety of vendors that offer their services and products to ACWA members at discounted rates. The best part is ACWA has already given them a stamp of approval through an in-depth RFP process. This saves you time and money! Services range from solar, energy, fleet management, translation services and more!

# 8

## Get Insured

An ACWA Membership provides agencies with the exclusive opportunity to partner with the ACWA/JPIA for liability, property, worker's compensation and employee benefits coverage — potentially saving agencies hundreds of thousands of dollars annually.
