The California Division of Safety of Dams judge Sugar Pine Reservoir Safe

On October 6th, 2021 an inspection of the Sugar Pine Dam and Reservoir was completed by the Division of Safety of Dams and staff. The dam is inspected annually to ensure it is performing as it should, to ensure it is still safe and to inspect for any developing issues. The conclusion of Foresthill's Sugar Pine Dam from the inspection is that the dam, reservoir, and all appurtenances are judged safe for continued use.

Next Foresthill Meeting

Wednesday,
May 11th, 2022
at 6:00 P.M.

Check your Foresthill website
for an agenda which will be
posted 72 hours before the
meeting

Winter fun fact-

*Water is everywhere, but only
2.5% of it is consumable*

Reservoir Updates

Rain Totals for 2021
-2022 = 49.38"

Storage = 6,922 Acre
Feet

Reservoir currently
100% full

Sugar Pine Reservoir is Full!

Foresthill Public Utility District's staff has been monitoring the reservoir very closely, adjusting, and making improvements year-round. On April 18th, 2022, Sugar Pine Reservoir filled to capacity and started spilling! Foresthill will continue to provide full water service to all our customers. This is a great sight to see for the summer months ahead! When spilling, the elevation of the reservoir is 3,618.10' = 6,922 acre-feet of water. Sugar Pine Reservoir is ready for all the summer activities we enjoy.

After the Storm

Our staff has been hard at work just like most of the Foresthill community to clean up the damage from the big December snowstorm. While this storm was great for our water supply it did come with some downfalls. The healthy-looking pine tree pictured below was approx. 100' tall and had about a 42" diameter was blocking roadway access to the Sugar Pine Dam. The challenge staff faced was getting the tree removed without causing the root ball and stump to slide down into the road. The clear out is complete.
